

## **CDPAP Services at Priority Cares (Since 2017)**

Priority Cares has proudly provided Consumer Directed Personal Assistance Program (CDPAP) services since 2017. This New York State Medicaid program empowers individuals to manage their own care by allowing them to select, train, and supervise their personal caregivers, often choosing trusted family members or friends.

### **Through our CDPAP program, we offer:**

- **Personal Care Assistance:** Support with daily living activities such as bathing, dressing, grooming, and meal preparation.
- **Flexible Caregiver Options:** Clients have the freedom to hire and oversee caregivers who understand their unique needs.
- **Comprehensive Care Coordination:** Our team ensures that clients are well-supported through the enrollment process, scheduling, and ongoing care management.
- **Caregiver Support:** We provide training, payroll processing, and administrative assistance to ensure caregivers are well-equipped and fairly compensated.

Since 2017, our CDPAP services have transformed the lives of countless individuals by offering personalized care solutions that prioritize comfort, dignity, and independence. We are dedicated to continuing this mission and expanding access to compassionate care for families across New York.
