

**Project: NHTD/TBI Program**

**Start Date: 2021**

**Type: Government Contract (Funded Program)**

We initiated services under the NHTD/TBI (Nursing Home Transition and Diversion / Traumatic Brain Injury) program in 2021. This government-funded program supports individuals transitioning out of nursing homes or living with traumatic brain injuries. As part of our involvement, we are currently offering four distinct services:

1. **ILST (Independent Living Skills Training)**
2. **CIC (Community Integration Counseling)**
3. **PBIS (Positive Behavioral Interventions and Supports)**
4. **SC (Service Coordination)**

In addition to these core services, we have been working collaboratively with other providers in the community to enhance service delivery. We have also initiated outreach efforts to shelter homes, aiming to establish stronger referral networks and further expand our service reach.

**Key Achievements:**

- Successful implementation of multiple services under the NHTD/TBI program.
- Collaboration with local service providers to offer holistic care solutions.
- Increased community outreach and referrals, particularly from shelter homes.

### Potential Areas for Growth:

- Expanding the network of collaborative providers.
- Increasing referrals through enhanced outreach efforts.
- Exploring additional service offerings to meet the evolving needs of our clients under the NHTD/TBI program.

This government contract has not only allowed us to provide essential services to individuals in need, but it has also positioned us as a key player in the healthcare services industry with a focus on trauma-informed care and community integration.
